

NO COMPROMISE STEEL BUILDING SOLUTIONS

STEEL BUILDINGS

The logo for Wide Span features a white silhouette of a wide-span roof structure above the text "Wide Span" in a white sans-serif font. This logo is positioned on a red rectangular background that partially overlaps the word "BUILDINGS" in the main title.

MADE IN THE USA

DESIGNED FOR LOCAL CONDITIONS WITH 100% QUALITY STEEL

Build with Confidence - The Wide Span Way.

At Wide Span, our steel buildings are pre-engineered with quality steel to meet your specifications. With unmatched design flexibility and innovative technology, we create resilient structures tailored to your needs.

- **Pre-engineered Cold-Formed Steel:** Engineered with superior precision.
- **Customization:** Tailored to your client's specifications.

BUILD WITH CONFIDENCE - THE WIDE SPAN WAY

Wide Span, proudly based in Texas, is dedicated to delivering exceptional pre-engineered steel buildings throughout the United States. Leveraging years of focused research and extensive global experience, we have developed a robust system that not only offers superior protection but also unmatched design flexibility. Our portal frames are meticulously engineered to withstand the toughest local conditions.

Technology - At Wide Span, we utilize cutting-edge technology to revolutionize the design and delivery of cold-formed steel buildings. Our proprietary software, the Sales Management System (SMS), is at the forefront of innovation, enabling quick and efficient design tailored to your specific criteria. With SMS, your sales team can craft your customer's dream structure in under 5 minutes, while our integrated CRM system ensures optimal time management and a seamless, personalized buying journey from quote to delivery.

Engineering - The SMS system pre-engineers all designs, reducing costs and minimizing the need for third-party engineers. This allows for seamless transitions from quote to order in as little as 15 minutes. Each structure is engineered for maximum strength and durability, meeting all local building codes and standards. Our package includes plans for County approvals and construction, making it perfect for DIY enthusiasts or your local contractors.
